Welcome message

Dear colleagues and friends from the GIS community, we wish you a warm welcome home at GIS conference 2018.

The Gulf Intervention Society was established at a time when the success of Gulf interventionists has been growing regionally and globally. The main aim of its composition was to gather efforts and opinions towards nominal goals that serve us as public, states and health care professionals for scientific, research and societal compatibility.

The group, which is part of the Gulf Heart Association, met to encourage national and regional interventionists to join the society and welcome their addition and participation, as well as developing a vision of cooperation between regional and international bodies in the field of Cardiovascular Intervention.

GIS's mission is to lead the Gulf interventional cardiovascular community through education, research, and quality patient care. To fulfill that mission, GIS recognizes its responsibility to promote the highest possible Educational levels, Research tools, Community interactions and ethical behavior by its members.

GIS founders and your coming members must recognize their responsibility towards patients, to society, to other physicians, and to other health professionals.

In this Occasion, we gladly invite you to join our mega networking Conference that will be held in Dubai from 17th to 19th of October 2018 at Intercontinental Festival city where we promise you to provide the most advanced Science & technology in this field

Yours Sincerely,

**President
Mohamed Al Mutairi, Kuwait**
